CAREER VISION

Looking for an entry-level position in a dynamic firm that values my analytical and technical skills and provides scope for updating my knowledge, I seek a company that will help me contribute to its development while concurrently aiding my personal growth.

PROJECTS

1)ARH Company: The Company Registration and Job Application platform is a comprehensive web application designed to streamline the process of registering a new company and applying for job positions within existing companies. The platform serves as a centralized hub for both entrepreneurs seeking to establish their businesses and individuals looking for employment opportunities.

2)My Portfolio: Welcome to my portfolio! As a Post-graduate or entry-level professional, this portfolio showcases my skills, educational background, and any relevant projects or experiences I have gained during my academic journey. While I may have limited professional experience, I am eager to demonstrate my potential and passion for the field I am pursuing.

3)Photography website: As a Frontend developer, I have also established a captivating photography website that showcases my work and services. Through my website, I aim to bring moments to life through the lens, capturing the beauty of the world and preserving cherished memories.

4)Online course LMS portal: Using WordPress, I successfully developed an engaging and interactive online course Learning Management System (LMS) portal. Through this LMS portal, I have created a platform for learners to access high-quality educational content and engage in a dynamic learning experience. The portal offers a user-friendly interface that makes it easy for students to navigate through the course materials, track their progress, and interact with the content.

5)Home Automation using Bolt IoT Module: I have successfully implemented a home automation system using Bolt IoT, an innovative platform that enables the integration of Internet of Things (IoT) technology into everyday objects. With the Bolt IoT platform, I have connected various devices and sensors within my home, allowing for remote control and automation of different functionalities. Through the Bolt Cloud and its accompanying mobile application, I can easily monitor and control the connected devices from anywhere, providing convenience, efficiency, and enhanced living experiences.
